QUOTA EXCHANGE

The market-clearing price established for the June 2013 Quota Exchange was **$31,495.00**.

The next Quota Exchange will be held on **July 15, 2013**. All offers to sell and bids to purchase quota through the Quota Exchange must be received at the SaskMilk office by midnight, **July 6, 2013**. SaskMilk recommends that offers and bids be submitted well in advance of the deadline date to ensure adequate time for corrections, if necessary.

When making bids on the Quota Exchange, the price on offers to sell quota is the minimum price that the producer is prepared to accept for that quota. Only if the market-clearing price is equal to or greater than the producer's minimum price will that producer qualify for participation in the Exchange. Conversely, the price on offers to purchase quota is the maximum price that the producer is prepared to pay for that quota. Only if the market-clearing price is equal to or less than the producer's maximum price will that producer qualify for participation in the Exchange. The clearing price is set at the price where the smallest difference exists between the accumulated volume offered for sale and the accumulated volume bid to purchase.

The results of the Quota Exchange are outlined in the following Table.

Saskatchewan is hosting WCC this year in Moose Jaw from August 27th - September 1st!
The theme this year is "COWNADIAN FOOTBALL"

It is such a great event which was initiated to provide an opportunity for dairy youth to compete and develop skills that will serve them not only in their future agribusiness careers, but within any field of work they may pursue. The youth will gain skills in leadership, teamwork, public speaking, agriculture/dairy science, dairy fitting, dairy judging, showmanship and citizenship. **Plan to attend and cheer on team Saskatchewan!**

In May, Saskatchewan had a monthly CDC allocation of **753,453 kilograms** of butterfat. In the month of May, Saskatchewan production was **1,515** of butterfat **over** and cumulatively **under** by **-60,815 kilograms** of butterfat. On a percentage basis, Saskatchewan is **-0.68%** within our CDC allocation flexibility limits based on the Continuous Quota model. The -1.50% lower flexibility limit is in effect.

Code of Practice

4.4 Identification and Branding

In Canada all dairy animals (alive or dead) must be identified by an approved ear tag. National Livestock Identification for Dairy (NLID) ear tags are required by Canadian law.

Animal identification is essential for tracing origin and destination of food-producing animals in order to protect both the nation's livestock industry and public health. Branding is not commonly practiced or recommended in the dairy industry.

REQUIREMENTS

All cattle must be identified using an approved ear tag as stipulated by applicable regulations.

Pain control must be used if branding is necessary. Face branding is prohibited.

RECOMMENDED BEST PRACTICES

a. rely on the NLID system as the primary means for identifying animals
b. apply identification (e.g., ear tag or tattoo) carefully to avoid unnecessary pain or distress and to minimize traumatic experiences
c. avoid branding unless essential for export requirements, and then only use one brand
d. use pain control methods (e.g., anti-inflammatory and/or analgesics) when branding
e. use non-toxic paints for temporary markers
f. adjust neck bands, chains, tail bands, or leg bands to avoid unnecessary discomfort

If You Can't Ship It - Test It!

BSE surveillance is still important and every animal tested makes a difference.

Support your cattle industry by having your 4-D (dead, diseased, dying or downer) cattle tested for BSE.

For more information, call the Canadian Food Inspection Agency at 1-877-727-5273.
